PROJECTS :

1. Android Messaging Application:

This application looks like our android application (like Whatsapp, Facebook , Instagram) using javascript through Android Studio Software. We can both send and receive messages, images, audios, files and documents.

2. Online Supply Chain Management:

It is a management system developed by using PHP, CSS,HTML, and javascript. This Project has a relation between customers and suppliers. It can manage sales , products , suppliers , customers and manage users. These all performed by Admin side.

3. Online Crime Reporting System:

The Online Crime Reporting System is the platform for reporting complaints of any crimes. It contains user side. The user side can either police or Victims/Complaints to the police is to get the help of solving the situation or crime registered. The users as complainers can simply register the complaint with all details required and submit it while the police officers can login and manage the complaints of all users. This project makes a convenient way for the victim to register the complaint fast and easily. They don't have to go to the police station every time for checking the updates of their case.
